PRICE FIVE CENTS

Formal Christmas Dance Tomorrow To Feature Mistletoe, Blue Lights

Tickets To Be On Sale At Morss Hall Door; Latecomers Welcome

Tickets for the Christmas Formal, to be held tomorrow night, Saturday, December 14, in Morss Hall of Walker Memorial, have not been sold out; there definitely will be door sales.

All of the lounges of Walker Memorial will be open to the dancers, and the committee said emphatically, mistletoe will be hung in very strategic locations.

The highlight of the evening will be the intermission entertainment. There will be carol singing by the Watertown Boys' Club Choir under the direction of Bob Masterson. Also John W. Weil, '48, will present a magic act. Afterwards everyone will join in singing Christmas carols. Refreshments will be served not only at intermission but also throughout the evening from 9:00 P.M. on.

Chaperons for the dance will be Dr. and Mrs. Compton, Professor and Mrs. Hamilton, Professor and Mrs. John B. Wilbur, Professor and Mrs. Jerome C. Hunsaker, Professor and Mrs. R. D. Douglass, and Professor A. A. Ashdown.

The Beavers that are assisting Chairman Friedman in arranging this "Mistletoe Special" are Ralph Segal, '49, Marshall Dick, '48, John R. Wittels, '47, Ronald J. R. Kawlman, '48, Donald L. Botway, '48, Jack E. Dresser, '50, Warren J. King, '48, Robert P. Abelson, '48, Caliste Alster, '49, Seymour V. Lassen, '50, and Pieter Schoonhoven, '49.

OFFICIAL NOTICE

Candidates for graduation in February, 1947, are notified that a Presentation of Degrees followed by the President's Reception will be held in Morss Hall at 4:00 P.M. on Wednesday, February 5, 1947. This notice is given in advance so that candidates may make personal arrangements during the holidays. At the beginning of the year each candidate will receive a return card on which he may indicate his final intentions to the Registrar.

Candidates for graduation in June, 1947, are also notified that formal exercises will be held in Symphony Hall at 11:00 A.M. on Friday, June 13, 1947.

Tech Show Calls Stage Crew Meet Tryouts Over; Shubert Theater May Be Rented

A meeting has been scheduled for 5:00 P.M. next Wednesday, December 18 in Tyler Lounge of Walker Memorial, for all persons interested in trying out for non-acting positions with the Tech show. This includes electricians, shop men, and general stage crew. Tryouts have been held every afternoon this week for the show itself, but so far few definite casts have been made. The male lead is to go to Harold A. Miller, '48, with Peter D. Ward, '47, in a supporting role. The female lead still is undecided.

Original music for the show is being written by Arnold S. Judson, and Antonio J. d'Almeida, '48, conduct the orchestra. According to Robert B. Hildebrand, '47, General Manager of the production, the script will be written over Christmas. He also stated that parts are being made to rent a bert theater for the show, which is scheduled for presentation in April.

Masaryk Talks To Large Crowd

Stresses Patience As Requirement For Peace

Quiet optimism and patience were the keynotes of the talk delivered by Dr. Jan Masaryk, Foreign Minister of Czechoslovakia, last Wednesday afternoon at 1:00 P.M. A capacity audience of more than 1000 persons, which filled both Huntington Hall and Room 10-275, heard Dr. Masaryk stress the improvements in international relations which has been brought about during the last eighteen months.

The talk was originally on the topic of "What is going on behind the Iron Curtain?" but Dr. Masaryk quickly disposed of that by stating that there was no iron curtain in Czechoslovakia. Rather, he stated:

"you must remember that during the past few years there has been a tremendous change in the world in general, and in Europe specifically; all that the Czechs are trying to do is fit into the new Europe, and you will find Czechoslovakia has changed less than Europe as a whole."

Dr. Masaryk then traced the United Nations' conferences during the past few months, underlining it with his self-termed "sad optimism." He admitted that in Paris the atmosphere was bad, but that the situation had greatly improved recently at the conference at Lake Success. He cited as his strong example the new, seeming agreement on armaments inspection.

Eliminate Thought of War

"This is a small world," quoted the Czech minister; "we have the

(Continued on Page 4)

Dr. Compton Asks For Continued Govt. Aid To Students

The U. S. Government should not terminate its financial assistance of students with the expiration of the G.I. Bill of Rights, but should be called on to continue to finance college education for those unable to afford it, was the opinion expressed by Dr. Karl T. Compton. Speaking at a banquet session of the sixty-first annual meeting of the New England Association of Colleges and Secondary Schools at the Hotel Statler last Friday, Dr. Compton deplored the fact that there are still so many deserving students unable to attend college because of financial difficulties.

During his speech, President Compton revealed that "only one in five boys and girls with intelligence equal to the top half of the present university students are now reaching the universities." Because of the continuing shortage of engineers and other trained personnel, colleges are planning to double the number of students now enrolled.

T.E.N. Staff Appointments Announced at Staff Dance

The Tech Engineering News announced this week the appointment, effective immediately, of a new Managing Board, Junior Board, and Staff for the coming term. The appointments were made at a staff dance last Friday night.

Elevated to posts on the Managing Board were John W. Weil, '48, General Manager; Edward M. Kosower, '49, Editor-in-chief; William C. Nemitz, '49, Business Manager; and Peter E. Piccoli, '48, Managing Editor.

Musical Clubs

Will Present "The Messiah"

Symphony Orchestra Gives First Concert Tonight at Rindge

The Combined Musical Clubs of Technology will present their first major production of the year, Handel's "The Messiah," Thursday at 8:15 P.M., December 19, at Rindge Tech Auditorium. The auditorium is located in Cambridge, near Harvard Square, at Ware and Broadway Streets. Tickets for the famed oratorio, which will be under the direction of Henry J. Warren and Antonio J. d'Almeida, '48, cost 60 and 90c. and may be purchased at T.C.A. or at the door.

Both the Boys' and Girls' Glee Clubs and the Symphony Orchestra will take part in the presentation. Over 250 voices are in the chorus, which includes many non-students,

Military Training Forum To Be Seen This Evening; Audience of Over 1100

Institute Committee BRIEFS

At yesterday's Institute Committee meeting a motion was passed to form a Public Relations Committee under the chairmanship of Kenneth S. Brock, '48. This committee will form a liaison between Institute activities and the general public. A motion was also passed to form a committee which will aid the Liberal Arts Society in getting underway.

A long discussion was held on the Sophomore dance budget which resulted in the decision to look into the matter further. This was because of the very high figures set for the budget by the Sophomore dance committee.

STROBOSCOPE CATCHES FOUL

Roy Haddox, Tech's leading scorer, is caught at one five-thousandth of a second as he is about to be fouled in the game with Boston University. Paced by Haddox, Jim Madden, Lou Morton and Captain Doug Watson, the Tech quintet outfought B.U. to emerge victor in the close contest played on Monday night at Walker Memorial. With the game tied and but seconds to go, Haddox sank three consecutive baskets to clinch the 54-48 win. Photo was taken by Maurice Goldberg, staff photographer for THE TECH, using the high-speed flash equipment developed by Dr. Harold Edgerton.

T.C.A. Under Goal Last Friday Night

\$1427 Given World Students Service Fund

When the annual drive of the Technology Christian Association ended last Friday night, the total amount collected was short of the \$6,000 goal by \$359. The total amount solicited was \$7068. This, however, included \$1427 for the World Student Fund so the total amount contributed for the TCA was \$5,641. Nevertheless, Mr. Ross, General Secretary of the TCA, said that they may hit the goal yet since contributions were still dribbling in.

The final drive statistics showed that the dormitories contributed a larger sum than either the fraternities or the commuters; however, a larger percentage of the members of the fraternities contributed. Following are the final statistics:

Frataternities, total, \$2,734; percentage, 91%; average individual contribution, \$3.08. Dormitories, \$2,865, 78%, \$2.23. And commuters, \$1469, 25%, and \$2.27.

T.E.N. To Sponsor Movies Of Bikini

Under the sponsorship of T.E.N. with the cooperation of the Lecture Series Committee, the official color films of the Bikini tests will be presented on Tuesday, December 17, in Room 10-250 at 4:00 P.M. and also at 5:00 P.M. Accompanying the movies will be a lecture by Joseph M. Rault, '48, who commanded a ship at Operations Crossroads. The destructive power of the atom is shown to its full extent in this film.

Six Sophomores Merit Appointments To W.M.C.

Six members of the Sophomore class have been appointed to the Walker Memorial Committee following a month-long competition. Those chosen are William S. Edgerly, Thomas L. Hilton, Marvin A. Asnes, William J. Weisz, John E. Whitman, and James I. Maslon, all '49.

Compton, LaFollette, Stoke, Petersen, and Gilstrap To Go On Air

Climaxing several weeks of increasing interest the M.I.T. V.A. sponsored forum on the question of universal military training will be held tonight in Morss Hall at 8:45 P.M. The speakers, Dr. Karl T. Compton, Mr. Howard C. Petersen, for the affirmative, and Mr. Philip L. LaFollette, and Dr. Harold W. Stoke for the negative, and the moderator, Mr. Max T. Gilstrap, will be heard by an overflow audience of 1050 on the main floor, 50 on the library balcony, and 100 on the east balcony.

The Army's plan of compulsory military training will be upheld by Dr. Compton and Mr. Petersen. The latter has acted as special assistant to Secretary of War Patterson since 1941. A holder of the Medal of Merit and the Exceptional Civilian Service Medal, he was appointed Assistant Secretary of War in December, 1945.

Dr. Compton, also a firm proponent of compulsory military training, in addition to his duties as President of the Institute, served during the war as chairman of the U. S. Radar Mission to the United Kingdom and as chief of the Office of Field Service of the O.S.R.D.

Mr. Lafollette, Governor of Wisconsin in 1931 and 1932 and again from 1934 to 1939, will uphold the negative side of the question. During the war he rose from Captain to Colonel in the Infantry, his last assignment being assistant to the chief of staff of General MacArthur. For his service of three years in the Pacific he holds the Legion of Merit and the Bronze Star.

Also against universal military training Dr. Stoke is now President of the University of New Hampshire. He taught political science at the University of Pennsylvania and was acting dean of the Graduate School of the University of Wisconsin before assuming his present duties in New Hampshire.

Student-Industry Symposium Held

Dr. Lewis, Mr. Westlaufer Treat Respective Roles

"What Industry Expects Of The Student" and conversely, "What The Student Can Expect From Industry" were discussed by Mr. Westlaufer of the Service Dept. of duPont Co. and by Dr. Warren K. Lewis of the Institute's Chemical Engineering department, respectively, at a symposium sponsored by the American Chemical Society yesterday afternoon at 4:30 P.M. in Huntington Hall.

Speaking to a capacity crowd, Mr. Westlaufer stated that the main qualities that industry looks for in a student are intelligence, imagination, character, responsibility, initiative, personality, cooperation, judgment, knowledge, health, and appearance, some firms looking for certain characteristics more than others. He stressed the fact that many students reaching industry have not acquired the ability to express their thoughts in writing and do not have a sufficient knowledge of economics, which enters into all phases of industry to a great extent. Mr. Westlaufer encouraged students to engage in extra-curricular activities to broaden their general scope.

Dr. Lewis forcefully declared that every student entering industry should have the right to increase the effectiveness of human effort.

SCYLLA AND CHARYBDIS

Last Sunday, there appeared in the Boston papers a report of a talk given by a professor of philosophy at Boston College to a group of Catholic educators. Making the statement that "the Hutchins and Conants and the Comptons are leading us along the slope of a cultural precipice," the professor went on to say that all science courses should be excluded from the curricula of Catholic colleges, since the "strange doctrines" which they introduce confuse the mind and undermine religion.

He went on to say, "In any non-Catholic college a student hears more error against the Catholic faith in one single day than he can refute in a whole life of scholarship." This is certainly a sad commentary on the potency of the church.

The view taken by this philosopher is certainly most extreme, but it leads us to reflection on the opposite pole, that of a curriculum which, for all practical purposes, submerges its "liberal" courses to such depths that their influence can scarcely be felt. This condition is very much in evidence here at Technology. The humanities instructors make valiant efforts to imbue their students with a smattering of liberality, but they are beating their heads against a stone wall of indifference and even antagonism caused by the general attitude of the faculty and general world of science and engineering.

Engineers and scientists must be inculcated with a sense of social responsibility. The idea has long been prevalent that these men are servants of humanity in the field of technological advance. They are there to do the work, and carry out this function admirably. But to be true servants of humanity, they must constantly ask themselves this question, "Am I working for the best interests of humanity; is humanity prepared to accept what I am about to bestow upon it, and if not, how can I help to prepare it for that acceptance?"

The only way in which the engineer or scientist can be prepared to answer this question with any degree of correctness is to know the factors which influence and affect mankind as well as man's current status. To be in a position to understand these all-important factors, the engineer and scientist must have a thorough grounding in the so-called "liberal" courses which serve to integrate his comprehension of science with that of his fellow man.

Until more of these courses can be introduced into the curriculum here at Technology, the student should make the most of what he is offered by taking his "liberal arts" courses seriously and absorbing them to the fullest extent. Only in this way can he round himself out as an individual and give himself that sense of social responsibility which is so vital to the future peace and security of humanity.

WE ARE HAPPY!

It was a pleasant experience, last Wednesday evening, to attend a dinner given by Dr. Everett M. Baker, our new Dean of Students, so that he might meet the Institute Committee. Dr. Baker asked for suggestions relating to the establishment of greater harmony between the students, faculty, and administration. At the end of the discussion, Dr. Baker remarked that these suggestions would be of inestimable value to him in the future. This was certainly most gratifying to hear, and is an indication that a sincere effort is being made to weld the students, faculty, and administration into a unified, organic whole.

Reviews & Previews

Despite a competent performance by the M.I.T. Dramashop of Oscar Wilde's overly witty farce, *The Importance of Being Earnest*, one was left with the impression that the evening would have been more worthwhile had a better play been chosen. The total effect of devastatingly witty epigrams falling like pearls from the lips of the miscellaneous assortment of characters wandering aimlessly about was completely overwhelming. The satire was at times brilliant, the aphorisms clever, but the monotony of repetition became tedious.

Several attempts have been made in the past two decades to revive the play. All failed. It is fairly obvious why. What was considered artful and even a bit risqué in Wilde's era is now dull and slow paced. The lengthy monologues and hasty asides definitely date the play. The satire on English society, furthermore, cannot be fully appreciated today.

What saved the show, however, was the general excellence of the production. The cast, on the whole, was well chosen, the staging effective, and the direction well paced. By far, the two most outstanding performances were turned in by Thomas B. Inglis, '47, as Algernon and Robert P. Abelson, '48, as Dr. Chasuble. Inglis, as the lead, motivated the entire action of the play. It was through his excellent timing and beautifully light chatter that the sometimes ponderous Wildean epigrams were at all projected to the audience. His artful posturing typified the period, and

his complete stage presence made everyone feel at ease.

Abelson was the perfect Chasuble, pompous, self-righteous, and celibate. Although the part was not a large one, his performance made it stand out above the others, certainly one of the high points of the evening. The remainder of the cast ranged from good to mediocre. Oscar Eubank, '50, as Jack, shows a good deal of promise, in spite of

his apparent discomfort on the stage.

Outstanding among the women in the cast was Edith Gould, G, who played the role of the socially sensitive Lady Bracknell with a polish that was most convincing. Margaret Coleman, '50, did a competent job as Cecily, although all too frequently, her manner smacked of the high school stage. The remainder of the cast was only adequate.

SERVICE TO THE STUDENT BODY

It's the first of the month—
every few days.

The first few days of the month were once a time of feverish activity for telephone accounting personnel. In that short period millions of telephone bills had to be prepared, checked and mailed. But the Bell System accounting staff, seeking to level off this work peak, found a practical solution.

It's called "rotation billing."

Now in our accounting departments, a new month begins every few days. Accounts are divided into six or more

even groups, each with a different billing date. This spreads the work evenly and eliminates the old last-minute rush.

This special problem, solved by telephone accountants, is typical of those which often confront management in the many branches of our business. They present a stimulating challenge to the young men with initiative and imagination who will find just such practical solutions...young men who find telephony an exciting and rewarding career.

There's Opportunity and Adventure in Telephony

BELL TELEPHONE SYSTEM

HOOPSTERS TAKE TWO WINS

Drop Opener To Harvard; Bounce Back To Victories Over B. U. And U. of N. H.

Watson, Haddox And Morton Star For Tech Squad

After dropping the opening game of the current season to Harvard, Tech's hoopsters jumped over to the victory column as they nosed out a Boston University five, 54-48, on Monday, and then went on to trounce New Hampshire, 60-45, in a game at Walker Gym on Wednesday evening.

Under the tutelage of Coach Henry McCarthy and led by their captain and able ball handler Doug Watson, the Engineers bowed to a sharper shooting Harvard quintet by the score of 56-33. Over 1200 spectators packed into Harvard's Memorial Gym last Saturday nite, December 7, to watch Tech's smaller, but harder-fighting quintet give Harvard more of a battle than the score would indicate.

Paced By Watson

Paced by Captain Watson, who tossed in 10 points, the Techmen displayed some fine play on the floor as time and time again they snatched the ball away from the tall Harvard forwards. However, when shooting the Tech hoopmen didn't seem to have their eye on the basket, and their shots rolled off the rims more times than they went in. It was these lost baskets and some 20 lost points which made up the margin of defeat.

Back at their home court on Monday night, the hoopsters regained their lost poise and edged out a taller Boston University quintet, 54-48. The game was close all the way, with B.U. tying the score at

36-36 at the end of the third quarter.

Haddox Scores 26 Points

Along with Captain Watson who did a remarkably fine job in directing Tech's offense and defense, forward Roy Haddox starred as he took scoring honors with the grand total of 26 of the Tech's 54 points. Lou Morton also played outstanding ball for the Tech-five jumping high to take the rebounds under both boards against the taller competition.

Trounce Univ. of N. H.

After tasting their first fruits of victory, an inspired Beaver five went onto the Walker floor on Wednesday, and thoroughly outplayed and outscored a weak New Hampshire five 60 to 45. Tech led all the way, and it provided an opportunity for Coach McCarthy to test his reserves for future action. Roy Haddox again compiled over 20 points to top the scoring for the victors, while Gabe Ciccone of last year's team ranked second with 11.

More action seemed to take place on the foul line then anywhere else as the rough playing New Hampshire boys were lax in the fouling department—in fact 21 points of our score were accounted for by successful foul shots. Lou Morton played his usually fine defensive game while the weaving and cutting of Haddox, Watson, Egan, and Ciccone baffled the losers. Bob Deutsch's fine play aided in building up Tech's early lead.

Two Games Before Xmas

Two games are scheduled before the Christmas vacation, one on Monday, December 16, with Mass. State at Walker gym and the other on Saturday, December 21, with Brown at Providence, R. I.

B. K. Basketball To Start On Sunday

A three way tie for first place between Sigma Chi, Building 22 and Sigma Alpha Epsilon climaxed the round robin of the Beaver Key Football tourney which ended last week. The finish of the football competition paved the way for the start of the forthcoming Beaver Key basketball tournament.

This tournament is scheduled to start on Sunday, December 15, with an eight game program in Walker Memorial Gym. Due to approaching finals and the scheduling of the Volleyball Tournament at the start of next term, the basketball tourney will be completed by January 13.

Since Tech's meager gymnasium facilities are inadequate for even varsity games and practices, Beaver Key has found it necessary to limit the play to straight elimination with a three team round robin to determine the winner.

Wood, Barracks "A" Top Dorm Basketball Tourney

The dormitory basketball tournament entered its second round this week with the Wood and Barracks "A" teams moving to the top of their respective leagues boasting two victories and no defeats apiece.

The first game on Monday evening, December 9, turned out to be a thriller between Wood and Hayden. A final score of 24-23 in Wood's favor indicates the closeness of the contest.

With three six-foot-five giants leading the attack, the Barracks "A" team defeated Walcott by a score of 33-23.

In the final game, La Force's 12 points and Davis's 10 points for the Senior House "B" team sank a valiant Barracks "D" five by the score of 36-32 despite Brisbin's 12 points for the losers.

Swimmers Meet Amherst Today

Team Drops Opener To Brown Natators

With Coach Gordon Smith anticipating plenty of keen-edged competition, the Varsity swimming team will battle the Amherst natators at 7:30 P. M. tonight over the Alumni Pool lanes in the first home meet of the season. Tomorrow afternoon at 4 o'clock will play host to the Wesleyan University swimmers.

In the first meet of the season, the Tech Varsity suffered a 41-34 setback against Brown University at Brown, last Saturday, December 7. Taking a first place in every event, and winning all but two second places, the freshman team fared far better in its opening contest of the year, to slaughter the Dean Academy swimmers the day before, December 6.

In the Varsity opener, Brown won both the relay events and took five of the seven individual first places. Although not providing the majority of the individual winners, the Techmen displayed a very well-balanced team and blanketed almost all of the second and third place scoring positions. Winners from the Engineers' contingent were Carl Thomsen, who copped the diving honors with 75.9 points, and John McCabe, who garnered a victory in the 150-yard backstroke.

The freshmen, boasting a number of fine swimmers, had no difficulty in overcoming the Dean Academy natators. The individual winners were Bob Edgar, in the 50-yard free style; Jim Hodges, breaststroke; Frank Conlin, 200-yard freestyle; Dick Dobroth, backstroke; Carl Mellin, 100-yard free-style; and Louis Lehmann, diving. Tech's 150-yard medley relay team of Frank Mauck, Bob Pelletier and Stewart Scott piled up a victory over the Academy tankmen, while the 200-yard freestyle team of Mellin, Conlin, Pelletier, and Edgar also spied triumph.

Hockey Squad Defeats Tufts In Opener, 6-2

Clifford & Thompson Lead The Engineers To Smashing Victory

Paced by hard-skating and sharp-shooting wings Jack Clifford and Tommy Thompson, the Hockey squad opened their season on Wednesday night as they overpowered Tufts at the Boston Arena by the score of 6-2.

The Tufts icers jumped into the offensive at the start of the game and gave goalie Bud Adams a tough time as they flooded him with shots. One third of the way through the first period Dave Eagan, Tufts right wing, broke the ice and scored the first goal of the game. After that marker, the Tech skaters who suffered from an apparent lack of experience in playing together as a unit, turned from the defense and managed to send in several shots at the Tufts nets. Bob Haines scored for Tufts as the second period opened to give Tufts its second and last score.

With the Jumbos from Medford holding a two point lead, the Tech skaters started moving and one minute later Chuck Nolan, Tech left wing put in the first goal. Nolan was assisted by team mate Jack Clifford, Tech's left defenseman. Clifford broke into his own about ten minutes later and his two unassisted goals put the Engineers out in front by a score of 3 to 2.

The Engineers jumped into the offense at the beginning of the third and final period. The first score of this period was by Tommy Thompson, Tech center, after six minutes and forty-seven seconds of the period had been played.

The sixth and final goal was scored at 15:12 of the final period when Charlie Tenney put a shot through the Tufts goalie.

Masaryk

(Continued from Page 1)

choice of living together or dividing the world. Division would be a major disaster... We cannot have a war, we must not have a war... nobody wants it, nobody needs it."

He stressed again that while Russia and the United States were different, they had enough points of agreement on which to concentrate. In a clarification of his own ideas which represent the policy of Czechoslovakia, Dr. Masaryk emphasized that the United Nations hinge on the Big Four. "If I put my case in the hands of the Big Four, not the Big One or Two, I can be assured it rests well." Therefore, he did not oppose the veto as violently as some of the other small nations did, although he does not like it. "However, with the veto over our head we have accomplished things thought impossible six months ago."

Patience, and More Patience

Dr. Masaryk again emphasized patience as far as a possible World government or federation were concerned until present mutual suspicions are eliminated. Ethical and cultural values have been destroyed in Europe and these must be brought to life, "We must bring forth in our mechanical advances their cultural values."

Musical Clubs

(Continued from Page 1)

while the orchestra, also composed not only of students, will number over fifty. Four women and two men will sing the solo parts.

Tonight at 8:15 the Symphony Orchestra will present its first concert of the season at Rindge Tech Auditorium. Under the direction of Antonio J. d'Almeida, '48, the orchestra will play its program in two parts. The first will include Lully's "Suite for Orchestra," Puccini's "Didon" Overture, and Handel's "Messiah" Overture and "Grand Concerto in B flat Major". In the second part will be Schubert's "Symphony No. 5 in B flat Major" and Couperin-Milhaud's "La Sultanne" Overture. Tickets will cost 60 and 90c. and are on sale at the door or T.C.A.

As another activity the Glee Clubs will lead the Institute in singing Christmas Carols next Thursday, December 19. At 11:45 classes will be dismissed and as many people as possible will assemble in the lobby of Building 7, for half an hour, to sing.

**M.I.T.A.A. MEETING**

All members of the M.I.T.A.A. are requested to attend a meeting of the organization which will be held in Faculty Lounge on Tuesday, December 17, at 5:00 P.M.

It has been announced that the numerals awarded to winning team members and managers of the Field Day events are now ready and may be picked up at the A.A. office any afternoon between 3:30 and 6:00 P.M.

Burton Room Tea For Dorms & 22

Both barracks and dormitory residents have been invited to a Christmas tea on Sunday, December 15, by the Dormitory Committee. The tea, which is somewhat of a postscript to the annual Christmas Dance, will be held in the Burton Room of Munroe Hall between 4:00 P.M. and 6:00 P.M. of the date mentioned.
